

Glen Rose School District

Request for Proposal for wireless access points RFP# 4702024RFPNS

The Glen Rose School District is seeking proposals to buy wireless access points and related equipment. The project is contingent on E-rate funding for the year July 1, 2024 to June 30, 2025. The vendor must provide a SPIN number provided by the SLD and be E-rate eligible. The district is not required to accept the lowest price and may reject any and all proposals. All equipment must be new and from an original equipment manufacturer. The district currently uses HP/Aruba switches and the new equipment must be able to be easily incorporated into the current network. The equipment listed is HP/Aruba or functional equivalent. If the vendor's proposal includes non-HP/Aruba equipment, it is incumbent upon the vendor to provide documentation that the equipment is a functional equivalent and can be incorporated into the existing HP/Aruba network. A limited lifetime warranty is required. Proposals must be effective for twelve(12) months from the time the proposal is accepted by the district in order to provide for the E-rate funding process. A copy of this RFP and any updates can be found at <http://www.grbeavers.org> under the Quick Links.

If you have any questions contact Bob Morrison at 501-467-1030 or email bmorriso@grbeavers.org . Deadline for submitting a proposal is 9:00 am CST January 31, 2024. Proposal should be emailed(preferred) or mailed to the contact information below.

I thank you for your time, effort, and interest in our network project.

Sincerely,

Bob Morrison, Technology Director
