

Hello Glen Rose community,

We are so pleased to announce another exciting development. Our school district has been selected to participate in the “Fresh Fruit and Vegetable Program” for the 2021-22 school year!

The Fresh Fruit and Vegetable Program (FFVP) will provide our elementary children with a variety of free, fresh fruits and vegetables, on select days, throughout the school week. It is an effective and creative way of introducing fresh fruits and vegetables as healthy snack options.

This will create healthier school environments by providing healthier food choices, increase children’s fruit and vegetable consumption, and make a difference in children’s diets to impact present and future health.

The Fresh Fruit and Vegetable Program will incorporate nutrition education and activities to promote good health and habits.

This program is seen as an important catalyst for change in efforts to combat childhood obesity by helping children learn about the “Why’s” of healthy eating. The FFVP introduces school children to a variety of produce that they otherwise might not have had the opportunity to sample.

We are so thrilled to have this priceless opportunity to expand our student’s food literacy education!

Be on the lookout for kid friendly recipe handouts that focus on the featured snack foods that you can make at home. We hope that their favorite, will become a family favorite.

This institution is an equal opportunity provider.
